FIRST ROBINSON FINANCIAL CORPORATION  
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation

The condensed consolidated financial statements include the accounts of First Robinson Financial Corporation (the "Company") and its wholly owned subsidiary, First Robinson Savings Bank, National Association (the "Bank"). All significant intercompany accounts and transactions have been eliminated in consolidation. The accompanying condensed consolidated financial statements are unaudited and should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Form 10-K filed with the Securities and Exchange Commission. The accompanying unaudited interim condensed consolidated financial statements have been prepared in accordance with the rules and regulations for reporting on Form 10-Q and Article 8-03 of Regulation S-X. Accordingly, they do not include information or footnotes necessary for a complete presentation of financial condition, results of operations, changes in stockholders' equity, and cash flows in conformity with accounting principles generally accepted in the United States of America. In the opinion of management of the Company, the unaudited condensed consolidated financial statements reflect all adjustments (consisting of normal recurring adjustments) necessary to present fairly the financial position of the Company at September 30, 2011, the results of its operations for the three and six month periods ended September 30, 2011 and 2010, the changes in stockholders' equity for the six month periods ended September 30, 2011 and 2010, and cash flows for the six month periods ended September 30, 2011 and 2010. The results of operations for those months ended September 30, 2011 are not necessarily indicative of the results to be expected for the full year.

The Condensed Consolidated Balance Sheet of the Company, as of March 31, 2011, has been derived from the audited Consolidated Balance Sheet for the Company as of that date.

Certain reclassifications have been made to the 2010 consolidated financial statements to conform to the 2011 financial statement presentation. These classifications had no effect on net income.

2. Recent Accounting Pronouncements

In April 2011, FASB issued ASU No. 2011-03 "*Reconsideration of Effective Control for Repurchase Agreements.*" The amendments in this ASU remove from the assessment of effective control the criterion relating to the transferor's ability to repurchase or redeem financial assets on substantially the agreed terms, even in the event of default by the transferee. The amendments in this ASU also eliminate the requirement to demonstrate that the transferor possesses adequate collateral to fund substantially all the cost of purchasing replacement financial assets. The guidance in this ASU is effective for the first interim or annual period beginning on or after December 15, 2011. The guidance should be applied prospectively to transactions or modifications of existing transactions that occur on or after the effective date. Early adoption is not permitted. The Company will adopt the methodologies prescribed by this ASU by the date required and does not anticipate that the ASU will have a material effect on its financial position or results of operations.

In May 2011, FASB issued ASU No. 2011-04 "*Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs.*" The amendments in this ASU generally represent clarifications of Topic 820, but also include some instances where a particular principle or requirement for measuring fair value or disclosing information about fair value measurements has changed. This ASU results in common principles and requirements for measuring fair value and for disclosing information about fair value measurements in accordance with U.S. GAAP and IFRSs. The amendments in this ASU are to be applied prospectively. For public entities, the amendments are effective during interim and annual periods beginning after December 15, 2011. Early application by public entities is not permitted. The Company will adopt the methodologies prescribed by this ASU by the date required and does not anticipate that the ASU will have a material effect on its financial position or results of operations.

FIRST ROBINSON FINANCIAL CORPORATION  
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

In June 2011, FASB issued ASU No. 2011-05 "Amendments to Topic 220, Comprehensive Income." Under the amendments in this ASU, an entity has the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. This ASU eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. The amendments in this ASU do not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. The amendments in this ASU should be applied retrospectively. For public entities, the amendments are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. Early adoption is permitted, because compliance with the amendments is already permitted. The amendments do not require any transition disclosures. The Company adopted the disclosures prescribed by this ASU and the adoption did not have a financial effect on the Company's financial position or results of operations.

3. Fair Value Measurements

ASC Topic 820, *Fair Value Measurements*, defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. FASB ASC No. 820 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

- Level 1** Quoted prices in active markets for identical assets or liabilities.
- Level 2** Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.
- Level 3** Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Following is a description of the valuation methodologies and inputs used for instruments measured at fair value on a recurring basis and recognized in the accompanying condensed consolidated balance sheet at September 30, 2011 and March 31, 2011.

FIRST ROBINSON FINANCIAL CORPORATION  
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

*Available-for-Sale Securities*

The fair value of available-for-sale securities are determined by various valuation methodologies. Where quoted market prices are available in an active market, securities are classified within Level 1. The Company has no Level 1 securities. If quoted market prices are not available, then fair values are estimated using pricing models or quoted prices of securities with similar characteristics. Level 2 securities include obligations of U.S. government corporations and agencies, obligations of states and political subdivisions, and mortgage-backed securities. The value of the Company's Level 2 securities is set forth below. In certain cases where Level 1 or Level 2 inputs are not available, securities are classified within Level 3 of the hierarchy. The Company has no Level 3 available-for-sale securities.

The following table presents the Company's assets that are measured at fair value on a recurring basis and the level within the hierarchy in which the fair value measurements fall as of September 30, 2011 and March 31, 2011 (in thousands):

| Description                                 | Carrying value at September 30, 2011 |  |   |   |
|---|--------------------------------------|--|---|---|
|   | Fair Value                           | Quoted Prices in Active Markets for Identical Assets (Level 1) | Significant Other Observable Inputs (Level 2) | Significant Unobservable Inputs (Level 3) |

The Company may be required, from time to time, to measure certain other financial assets and liabilities on a nonrecurring basis. These adjustments to fair value usually result from application of lower-of-cost-or-market accounting or write-downs of individual assets. Following is a description of the valuation methodologies and inputs used for assets measured at fair value on a non-recurring basis and recognized in the accompanying balance sheets, as well as the general classification of such assets and liabilities pursuant to the valuation hierarchy.

*Impaired Loans (Collateral Dependent)*

Loans for which it is probable that the Company will not collect all principal and interest due according to contractual terms are measured for impairment. Allowable methods for estimating fair value include using the fair value of the collateral for collateral dependent loans.

FIRST ROBINSON FINANCIAL CORPORATION  
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

If the impaired loan is identified as collateral dependent, then the fair value method of measuring the amount of the impairment is utilized. This method requires reviewing an independent appraisal of the collateral and applying a discount factor to the value based on management's estimation process.

Impaired loans are classified within Level 3 of the fair value hierarchy, when impairment is determined using the fair value method. Fair value adjustments on impaired loans were \$435,000 for the six months ended September 30, 2011 and \$146,000 for the year ended March 31, 2011.

**Mortgage Servicing Rights**

The fair value used to determine the valuation allowance is estimated using discounted cash flow models. Due to the nature of the valuation inputs, mortgage servicing rights are classified within Level 3 of the hierarchy.

**Foreclosed Assets Held for Sale**

Fair value of foreclosed assets held for sale is based on market prices determined by appraisals less discounts for costs to sell. Foreclosed assets held for sale are classified within Level 2 of the valuation hierarchy.

The following table presents the fair value measurement of assets measured at fair value on a nonrecurring basis and the level within the fair value hierarchy in which the fair value measurements fall at September 30, 2011 and March 31, 2011:

| Description                           | Fair Value | Carrying value at September 30, 2011                           |   |   |

| Foreclosed assets held for sale, net  | 218        | —  | 218   | —   |

The following methods were used to estimate fair values of the Company's financial instruments. The fair values of certain of these instruments were calculated by discounting expected cash flows, which involves significant judgments by management and uncertainties. Fair value is the estimated amount at which financial assets or liabilities could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. Because no market exists for certain of these financial instruments and because management does not intend to sell these financial instruments, the Company does not know whether the fair values shown below represent values at which the respective financial instruments could be sold individually or in the aggregate.

FIRST ROBINSON FINANCIAL CORPORATION  
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Carrying amount is the estimated fair value for cash and cash equivalents, interest-bearing deposits, loans held for sale, federal funds sold, Federal Reserve and Federal Home Loan Bank stocks, accrued interest receivable and payable, and advances from borrowers for taxes and insurance. Security fair values equal quoted market prices, if available. If quoted market prices are not available, fair value is estimated based on quoted market prices of similar securities. The fair value of loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. Loans with similar characteristics were aggregated for purposes of the calculations. On demand deposits, savings accounts, NOW accounts, and certain money market deposits the carrying amount approximates fair value. The fair value of fixed-maturity time deposits is estimated using a discounted cash flow calculation that applies the rates currently offered for deposits of similar remaining maturities. On other borrowings and short-term borrowings, rates currently available to the Company for debt with similar terms and remaining maturities are used to estimate the fair value of existing debt. The fair value of commitments to originate loans is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value of forward sale commitments is estimated based on current market prices for loans of similar terms and credit quality. The fair values of letters of credit and lines of credit are based on fees currently charged for similar agreements or on the estimated cost to terminate or otherwise settle the obligations with the counterparties at the reporting date.

FIRST ROBINSON FINANCIAL CORPORATION  
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

4. Federal Home Loan Bank Stock

The Company owns approximately \$879,000 of Federal Home Loan Bank of Chicago ("FHLB") stock. During the third quarter of 2007, the FHLB of Chicago received a Cease and Desist Order from its regulator, the Federal Housing Finance Board. The order generally prohibits capital stock repurchases and redemptions until a time to be determined by the Federal Housing Finance Board. The FHLB will continue to provide liquidity and funding through advances. The FHLB did not pay a dividend during the fourth quarter of 2007 or the calendar years of 2008 through 2010. The FHLB has paid a cash dividend at an annualized rate of 10 basis points per share for the first and second quarters of 2011. Management performed an analysis and deemed the Company's cost method investment in FHLB stock to be recoverable as of September 30, 2011.

5. Authorized Share Repurchase Program

The share repurchase program approved by the Board of Directors on August 17, 2010 expired August 16, 2011 with 1,555 shares purchased of the 5,000 shares approved in the program. On September 20, 2011, the Board of Directors voted to approve an additional stock repurchase program of 5,000 shares, or approximately 1.2%, of the Company's issued and outstanding shares. The repurchase program will expire upon the earlier of the completion of the purchase of an aggregate of shares or September 19, 2012. As of September 30, 2011, there had been no shares purchased in the current program.

6. Investment Securities

The amortized cost and approximate fair values of securities are as follows:

There were no sales of investment securities during the three months or six months ended September 30, 2011 or September 30, 2010.

The following table shows our investments' gross unrealized losses and fair value (in thousands), aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position at September 30, 2011 and March 31, 2011. At September 30, 2011, the Company does not hold any security that it considers other-than-temporarily impaired.

| Total temporarily impaired securities        | \$ 1,681            | \$ 37             | \$ —                | \$ —              | \$ 1,681   | \$ 37             |

There are two securities in unrealized loss positions in the investment portfolio at September 30, 2011, due to interest rate changes and not credit events. The unrealized losses are considered temporary and, therefore, have not been recognized into income, because the issuers are of high credit quality and the Bank has the ability and intent to hold for the foreseeable future. The fair values are expected to recover as the investments approach their maturity dates or there is a downward shift in interest rates. All but one of the mortgage-backed securities in the portfolio are residential properties. One of the mortgage-backed securities with a temporary loss is secured by 5 or more dwelling units.

The Company is a community-oriented financial institution that seeks to serve the financial needs of the residents and businesses in its market area. The Company considers Crawford County and surrounding counties in Illinois and Knox County and surrounding counties in Indiana as its market area. The principal business of the Company has historically consisted of attracting retail deposits from the general public and primarily investing those funds in one- to four-family residential real estate loans, commercial, multi-family and agricultural real estate loans, consumer loans, and commercial business and agricultural finance loans. For the most part, loans are collateralized by assets, primarily real estate, of the borrowers and guaranteed by individuals. Repayment of the loans is expected to come from cash flows of the borrowers or from proceeds from the sale of selected assets of the borrowers.

Loan originations are developed from continuing business with (i) depositors and borrowers, (ii) real estate broker referrals, (iii) auto dealer referrals, and (iv) walk-in customers. All of the Company's lending is subject to its written underwriting standards and loan origination procedures. Upon receipt of a loan application, it is first reviewed by a loan officer in the loan department who checks applications for accuracy and completeness. The Company's underwriting department then gathers the required information to assess the borrower's ability to repay the loan, the adequacy of the proposed collateral, the employment stability and the credit-worthiness of the borrower. The financial resources of the borrower and the borrower's credit history, as well as the collateral securing the loan, are considered an integral part of each risk evaluation prior to approval. A credit report is obtained to verify specific information relating to the applicant's employment and credit standing. Income is verified using W-2 information, tax returns or pay-stubs of the potential borrower. In the case of a real estate loan, an appraisal of the real estate intended to secure the proposed loan is undertaken by an independent appraiser approved by the Company. The board of directors has established individual lending authorities for each loan officer by loan type. Loans over an individual officer's lending limits must be approved by a loan officer with a higher lending limit, with the highest being that of the president and senior loan officer who have a combined lending authority up to \$500,000. Loans with a principal balance over this limit must be approved by the directors' loan committee, which meets weekly and consists of the chairman of the board, all outside directors, the president, the senior loan officer and loan officers. The senior loan officer and loan officers do not vote on the loans presented. The board of directors ratifies all loans that are originated. Once the loan is approved, the applicant is informed and a closing date is scheduled. Loan commitments are typically funded within 30 days.

The Company requires evidence of marketable title and lien position or appropriate title insurance on all loans secured by real property. The Company also requires fire and extended coverage casualty insurance in amounts at least equal to the lesser of the principal amount of the loan or the value of improvements on the property, depending on the type of loan. As required by federal regulations, the Company also requires flood insurance to protect the property securing its interest if such property is located in a designated flood area.

FIRST ROBINSON FINANCIAL CORPORATION  
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

The Company's lending can be summarized into five primary areas; residential real estate loans, commercial real estate and farmland loans, commercial and agricultural finance loans, consumer loans and loans to state and municipal government loans. A description of each of the lending areas can be found in the Company's Annual Report on Form 10-K for the year ended March 31, 2011. The significant majority of the lending activity occurs in the Company's Illinois market, with the remainder in the Indiana market. Management reserves the right to change the amount or type of lending in which it engages to adjust to market or other factors.

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to income. Loan losses are charged against the allowance when management believes the uncollectability of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectability of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral, and prevailing economic conditions. This evaluation is inherently subjective, as it requires estimates that are susceptible to significant revision as more information becomes available. Management's evaluation is also subject to review and potential change, by bank regulatory authorities.

The allowance consists of allocated and general components. The allocated component relates to loans that are classified as impaired. For those loans that are classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. The general component covers nonclassified loans and is based on historical charge-off experience and expected loss given default derived from the Company's internal risk rating process. Other adjustments may be made to the allowance for pools of loans after an assessment of internal and external influences on credit quality that are not fully reflected in the historical loss or risk rating data.

There have been no significant changes to the Company's accounting policies or methodology from the prior periods.

The following tables present the balance in the allowance for loan losses and the recorded investment in loans based on portfolio segment and impairment method as of September 30, 2011 and March 31, 2011:

|                                   | For Six Months Ended September 30, 2011 |                         |               |                       |                                |                 |

Management's opinion as to the ultimate collectability of loans is subject to estimates regarding future cash flows from operations and the value of property, real and personal, pledged as collateral. These estimates are affected by changing economic conditions and the economic prospects of borrowers.

**Credit Quality Indicators**

The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends among other factors. The Company analyzes loans individually by classifying the loans as to credit risk. This analysis is performed on all loans at origination. In addition, commercial lending relationships over \$100,000 are reviewed annually by the credit analyst or senior loan officer in our loan department in order to verify risk ratings. The Company uses the following definitions for risk ratings:

**Watch** – Loans classified as watch have minor weaknesses or negative trends. There is a possibility that some loss could be sustained

**Special Mention** – Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the institution's credit position at some future date.

**Substandard** – Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

FIRST ROBINSON FINANCIAL CORPORATION  
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

**Doubtful** – Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Loans not meeting the criteria above that are analyzed individually as part of the above described process are considered to be Pass rated loans.

The following tables present the credit risk profile of the Company’s loan portfolio based on rating category and payment activity as of September 30, 2011 and March 31, 2011:

|                 | September 30, 2011     |                         |                  |                       |                                |                   |

The accrual of interest on mortgage and commercial loans is discontinued at the time the loan is 90 days past due unless the credit is well-secured and in process of collection. Past due status is passed on contractual terms of the loan. In all cases, loans are placed on nonaccrual or charged off at an earlier date if collection of principal or interest is considered doubtful.

All interest accrued but not collected for loans that are placed on nonaccrual or charged off are reversed against interest income. The interest on these loans is accounted for on the cash-basis or cost-recovery method, until qualifying for return to accrual. Loans are returned to accrual basis when all the principal and interest amounts contractually due are brought current and future payments are reasonable assured.

A loan is considered impaired, in accordance with the impairment accounting guidance (ASC 310-10-35-16), when based on current information and events, it is probable the Company will be unable to collect all amounts due from the borrower in accordance with the contractual terms of the loan. Impaired loans include nonperforming commercial loans but also include loans modified in troubled debt restructurings where concessions have been granted to borrowers experiencing financial difficulties. These concessions could include a reduction in the interest rate on the loan, payment extensions, forgiveness of principal, forbearance or other actions intended to maximize collection.

Impairment is measured on a loan-by-loan basis by either the present value of the expected future cash flows, the loan's observable market value, or, for collateral-dependent loans, the fair value of the collateral adjusted for market conditions and selling expenses. Significant restructured loans are considered impaired in determining the adequacy of the allowance for loan losses.

The Company actively seeks to reduce its investment in impaired loans. The primary tools to work through impaired loans are settlement with the borrowers or guarantors, foreclosure of the underlying collateral, or restructuring.

The Company will restructure loans when the borrower demonstrates the inability to comply with the terms of the loan, but can demonstrate the ability to meet acceptable restructured terms. Restructurings generally include one or more of the following restructuring options; reduction in the interest rate on the loan, payment extensions, forgiveness of principal, forbearance, or other actions intended to maximize collection. Restructured loans in compliance with modified terms are classified as impaired.

During the three months ended September 2011, the Company adopted the provisions of the Financial Accounting Standards Board's ("FASB") Accounting Standards Update ("ASU") No. 2011-02, *Receivables (Topic 310): A Creditor's Determination of Whether a Restructuring Is a Troubled Debt Restructuring ("TDR")*. Management applied the guidance on determining whether any restructurings that occurred from April 1, 2011 or later met the definition of a TDR. TDRs at September 30, 2011 and March 31, 2011 totaled \$394,000, and \$466,000, respectively. At September 30, 2011, the Company had a related allowance for loan losses of \$23,000 allocated to these TDRs, compared to \$19,000 at March 31, 2011. As of September 30, 2011, the Company had \$204,000 classified as TDRs performing as agreed under the terms of their restructured plans and \$189,000 not performing as agreed under the terms of the restructured plans. For the three and six month periods ended September 30, 2011, there were no loans modified as a TDR. The following table presents an analysis of TDRs as of September 30, 2011 and March 31, 2011.

FIRST ROBINSON FINANCIAL CORPORATION  
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

8. Lines of Credit

The Company's \$2.5 million revolving line of credit note payable matured September 30, 2011 and was renewed until September 30, 2012. The balance of the revolving line of credit was \$2,000,000 and \$1,800,000 as of September 30, 2011 and March 31, 2011, respectively. The note bears interest at the prime commercial rate with a floor of 3.50% which was the rate on September 30, 2011 and is secured by 100% stock of the Bank.

During the six months ended September 30, 2011, the revolving line of credit maintained by the Bank with an unaffiliated financial institution increased to \$6,700,000 from the \$5,000,000 line at March 31, 2011, of which no amounts were outstanding at September 30, 2011 or March 31, 2011. The line bears interest at the federal funds rate of the financial institution (1.15% at September 30, 2011), has an open-end maturity and is unsecured if used for less than thirty (30) consecutive days.

The Bank has also established borrowing capabilities at the Federal Reserve Bank of St. Louis discount window. Investment securities of \$3,000,000 have been pledged as collateral. As of September 30, 2011 and March 31, 2011 no amounts were outstanding. The primary credit borrowing rate at September 30, 2011 was 0.50%, has a term of up to 90 days, and has no restrictions on use of the funds borrowed.

9. Other Borrowings

Other borrowings included the following:

|   | <u>September 30,</u><br><u>2011</u> | <u>March 31,</u><br><u>2011</u> |
|---|-------------------------------------|---------------------------------|
|   | (In thousands)                      |                                 |
| Securities sold under repurchase agreements | <u>\$ 17,810</u>                    | <u>\$ 15,620</u>                |

Securities sold under agreements to repurchase consist of obligations of the Company to other parties. The obligations are secured by investments and such collateral is held by the Company in safekeeping at a correspondent bank. The maximum amount of outstanding agreements at any month end during the six months ending September 30, 2011 and the year ending March 31, 2011 totaled \$17,810,000 and \$20,388,000, respectively. The monthly average of such agreements totaled \$14,447,000 for the six months ending September 30, 2011 and \$17,401,000 for the twelve months ending March 31, 2011. The average rate on the agreements for the six months ending September 30, 2011 and for the twelve months ending March 31, 2011 was 0.25%. The agreements at September 30, 2011, mature periodically within 24 months. The Company has a repurchase agreement with one customer with an outstanding balance of \$9.1 million at September 30, 2011. The repurchase agreement matures daily.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

10. Earnings Per Common Share for the Three-Month Periods

Basic earnings per share is calculated by dividing net income by the weighted average number of common shares outstanding during the period. Diluted earnings per share gives effect to the increase in the average shares outstanding resulting from the effect of the incentive plan shares. The components of basic and diluted earnings per share for the three months ended September 30, 2011 and 2010 were computed as follows (dollar amounts in thousands except share data):

|   |               | <u>Weighted<br/>Average<br/>Shares</u> | <u>Per Share<br/>Amount</u> |
|---|---------------|--|-----------------------------|
| <b>For the Three-Months Ended September 30, 2011:</b> |               |  |                             |
| <b>Basic Earnings per Common Share:</b>               |               |  |                             |
| Income available to common stockholders               | \$ 567        | 410,853                                | \$ <u>1.38</u>              |
| <b>Effect of Dilutive Securities:</b>                 |               |  |                             |

11. Earnings Per Common Share for the Six-Month Periods

Basic earnings per common share is calculated by dividing net income by the weighted average number of common shares outstanding during the period. Diluted earnings per share gives effect to the increase in the average shares outstanding which would have resulted from the exercise of dilutive stock options. The components of basic and diluted earnings per share for the six months ended September 30, 2011 and 2010 were computed as follows (dollar amounts in thousands except share data):

|   |               | <u>Weighted<br/>Average<br/>Shares</u> | <u>Per Share<br/>Amount</u> |
|---|---------------|--|-----------------------------|
| <b>For the Six-Months Ended September 30, 2011:</b> |               |  |                             |
| <b>Basic Earnings per Common Share:</b>             |               |  |                             |
| Income available to common stockholders             | \$ 968        | 411,041                                | <u>\$ 2.36</u>              |

FIRST ROBINSON FINANCIAL CORPORATION  
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

12. Participation in the Small Business Lending Fund of the U.S. Treasury Department

On August 23, 2011, the Company entered into a Securities Purchase Agreement with the Secretary of the U. S. Treasury, pursuant to which the Company issued and sold to the Treasury 4,900 shares of its Senior Non-Cumulative Perpetual Preferred Stock, Series A, having a liquidation preference of \$1,000 per share (the "Series A Preferred Stock"), for aggregate proceeds of \$4,900,000. The issuance was pursuant to the Treasury's Small Business Lending Fund program, established under the Small Business Jobs Act of 2010, which encourages lending to small businesses by providing capital to qualified community banks with assets of less than \$10 billion. The Series A Preferred Stock is entitled to receive non-cumulative dividends payable quarterly on each January 1, April 1, July 1 and October 1, commencing October 1, 2011. The dividend rate, which is calculated on the aggregate Liquidation Amount, has been initially set at 1% per annum based upon the current level of "Qualified Small Business Lending" ("QSBL") by the Bank. The dividend rate for future dividend periods will be set based upon the percentage change in qualified lending between each dividend period and the baseline QSBL level established at the time the Agreement was entered into. Such dividend rate may vary from 1% per annum to 5% per annum for the second through tenth dividend periods, and from 1% per annum to 7% per annum for the eleventh through the first half of the nineteenth dividend periods. If the Series A Preferred Stock remains outstanding for more than four-and-one-half years, the dividend rate will be fixed at 9%. Prior to that time, in general, the dividend rate decreases as the level of the Bank's QSBL increases. Such dividends are not cumulative, but the Company may only declare and pay dividends on its common stock (or any other equity securities junior to the Series A Preferred Stock) if it has declared and paid dividends for the current dividend period on the Series A Preferred Stock, and is subject to other restrictions on its ability to repurchase or redeem other securities. In addition, if (i) the Company has not timely declared and paid dividends on the Series A Preferred Stock for six dividend periods or more, whether or not consecutive, and (ii) shares of Series A Preferred Stock with an aggregate liquidation preference of at least \$25,000,000 are still outstanding, the Treasury (or any successor holder of Series A Preferred Stock) may designate two additional directors to be elected to the Company's Board of Directors.

As is more completely described in the Certificate of Designation, holders of the Series A Preferred Stock have the right to vote as a separate class on certain matters relating to the rights of holders of Series A Preferred Stock and on certain corporate transactions. Except with respect to such matters and, if applicable, the election of the additional directors, the Series A Preferred Stock does not have voting rights.

The Company may redeem the shares of Series A Preferred Stock, in whole or in part, at any time at a redemption price equal to the sum of the Liquidation Amount per share and the per-share amount of any unpaid dividends for the then-current period, subject to any required prior approval by the Company's primary federal banking regulator, the Office of the Comptroller of the Currency.

Item 2:

FIRST ROBINSON FINANCIAL CORPORATION  
Management's Discussion and Analysis of Financial Condition  
And Results of Operations

Management's discussion and analysis of financial condition and results of operations is intended to assist in understanding the financial condition and results of the Company. The information contained in this section should be read in conjunction with the unaudited condensed consolidated financial statements and accompanying notes thereto.

**Forward-Looking Statements**

This document, including information incorporated by reference, contains "forward-looking statements" (as that term is defined in the Private Securities Litigation Reform Act of 1995). These forward-looking statements may be identified by the use of such words as: "believe", "expect", "anticipate", "intend", "plan", "estimate", or words of similar meaning, or future or conditional verbs such as "will," "would," "should," "could," or "may."

Examples of forward-looking statements include, but are not limited to, estimates or projections with respect to our future financial condition, results of operations or business, such as: projections of revenues, income, earnings per share, capital expenditures, assets, liabilities, dividends, capital structure, or other financial items; descriptions of plans or objectives of management for future operations, products, or services, including pending acquisition transactions; forecasts of future economic performance; and descriptions of assumptions underlying or relating to any of the foregoing. By their nature, forward-looking statements are subject to risks and uncertainties. There are a number of factors, many of which are beyond our control, that could cause actual conditions, events, or results to differ significantly from those described in the forward-looking statements.

Factors which could cause or contribute to such differences include but are not limited to: general business and economic conditions on both a regional and national level; worldwide political and social unrest, including acts of war and terrorism; increased competition in the products and services we offer and the markets in which we conduct our business; the interest rate environment; fluctuations in the capital markets, which may directly or indirectly affect our asset portfolio; legislative or regulatory developments, including changes in laws concerning taxes, banking, securities, insurance and other aspects of the financial services industry; technological changes, including the impact of the Internet; monetary and fiscal policies of the U.S. Government, including policies of the U.S. Treasury and the Federal Reserve Board; accounting principles, policies, practices or guidelines; deposit attrition, operating costs, customer loss and business disruption greater than the Company expects; the occurrence of any event, change or other circumstance that could result in the Company's failure to develop and implement successful capital raising and debt restructuring plans.

Any forward-looking statements made in this report or incorporated by reference in this report are made as of the date of this report, and, except as required by applicable law, we assume no obligation to update the forward-looking statements or to update the reasons why actual results could differ from those projected in the forward-looking statements. You should consider these risks and uncertainties in evaluating forward-looking statements and you should not place undue reliance on these statements. We decline any obligation to publicly announce future events or developments that may affect the forward-looking statements herein.

**Critical Accounting Policies**

The accounting and reporting policies of the Company are in accordance with accounting principles generally accepted in the United States and conform to general practices within the banking industry. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions. The financial position and results of operations can be affected by these estimates and assumptions and are integral to the understanding of reported results. Critical accounting policies are those policies that management believes are the most important to the portrayal of the Company's financial condition and results, and they require management to make estimates that are difficult, subjective, or complex.

**Allowance for Loan Losses** - The allowance for loan losses provides coverage for probable losses inherent in the Company's loan portfolio. Management evaluates the adequacy of the allowance for credit losses each quarter based on changes, if any, in underwriting activities, the loan portfolio composition (including product mix and geographic, industry or customer-specific concentrations), trends in loan performance, regulatory guidance and economic factors. This evaluation is inherently subjective, as it requires the use of significant management estimates. Many factors can affect management's estimates of specific and expected losses, including volatility of default probabilities, rating migrations, loss severity and economic and political conditions. The allowance is increased through provisions charged to operating earnings and reduced by net charge-offs.

FIRST ROBINSON FINANCIAL CORPORATION  
Management's Discussion and Analysis of Financial Condition  
And Results of Operations

The Company determines the amount of the allowance based on relative risk characteristics of the loan portfolio. The allowance recorded for commercial loans is based on reviews of individual credit relationships and an analysis of the migration of commercial loans and actual loss experience. The allowance recorded for homogeneous consumer loans is based on an analysis of loan mix, risk characteristics of the portfolio, fraud loss and bankruptcy experiences, and historical losses, adjusted for current trends, for each homogenous category or group of loans. The allowance for credit losses relating to impaired loans is based on the loan's observable market price, the collateral for certain collateral-dependent loans, or the discounted cash flows using the loan's effective interest rate.

Regardless of the extent of the Company's analysis of customer performance, portfolio trends or risk management processes, certain inherent but undetected losses are probable within the loan portfolio. This is due to several factors including inherent delays in obtaining information regarding a customer's financial condition or changes in their unique business conditions, the judgmental nature of individual loan evaluations, regulatory input, collateral assessments and the interpretation of economic trends. Volatility of economic or customer-specific conditions affecting the identification and estimation of losses for larger non-homogeneous credits and the sensitivity of assumptions utilized to establish allowances for homogeneous groups of loans are among other factors. The Company estimates a range of inherent losses related to the existence of the exposures. The estimates are based upon the Company's evaluation of risk associated with the commercial and consumer allowance levels and the estimated impact of the current economic environment.

### Overview

First Robinson Financial Corporation (the "Company") is a bank holding company that was chartered under the laws of the State of Delaware in March 1992. Its primary business is the ownership of First Robinson Savings Bank, National Association (the "Bank"), a national bank that was also chartered in 1997 and whose predecessor was First Robinson Savings & Loan which had been serving the financial needs of Crawford County since 1883. The Company is headquartered in Robinson, Illinois and the Bank operates three full service banking offices and one drive-up facility in Crawford County, Illinois and one full service banking office in Knox County, Indiana. We use the "Company" and the "Bank" interchangeably herein when discussing the activities and the assets and liabilities of the Bank.

Assets of the Company decreased by \$7.1 million, or 3.4%, to \$201.7 million at September 30, 2011 from \$208.8 million at March 31, 2011. See "Financial Condition" for more information. The Company is reporting net income available to common shareholders of \$567,000 for the three months and \$968,000 for the six months ending September 30, 2011 versus net income of \$404,000 for the three months and \$820,000 for the six months ending September 30, 2010. See "Results of Operations" for further information. Basic and diluted earnings per common share for the three month period ending September 30, 2011 were \$1.38 and \$1.33, respectively, compared to basic and diluted earnings per common share of \$0.98 and \$0.94 for the three-months ended September 30, 2010. Basic and diluted earnings per common share for the six month period ending September 30, 2011 were \$2.36 and \$2.27, respectively, compared to basic and diluted earnings per common share of \$1.98 and \$1.91 for the six-months ended September 30, 2010. Diluted earnings per share reflect additional potential common shares that would have been outstanding if dilutive potential common shares had been issued, as well as any adjustment to income that would result from the assumed issuance. Potential common shares that may be issued by the Company relate solely to outstanding incentive plan shares and are determined using the treasury stock method.

The most significant event this quarter was the issuance by the Company of 4,900 shares of Senior Non-Cumulative Preferred Stock, Series A to the U.S. Treasury for aggregate proceeds of \$4.9 million. See Note 12 of Notes to Condensed Consolidated Financial Statements.

We continue to maintain a strong presence in the community and are one of the few independent community banks in our primary market area. To visit First Robinson Savings Bank on the web, go to [www.frbsb.net](http://www.frbsb.net).

FIRST ROBINSON FINANCIAL CORPORATION  
 Management's Discussion and Analysis of Financial Condition  
 And Results of Operations

Asset Quality

**Delinquencies.** When a borrower fails to make a required payment on a loan, the Company attempts to cause the delinquency to be cured by contacting the borrower. In the case of loans secured by real estate, reminder notices are sent to borrowers. If payment is late, appropriate late charges are assessed and a notice of late charges is sent to the borrower. If the loan is between 60-90 days delinquent, the loan will generally be referred to the Company's legal counsel for collection.

When a loan becomes more than 90 days delinquent and collection of principal and interest is considered doubtful, or is otherwise impaired, the Company will generally place the loan on non-accrual status and previously accrued interest income on the loan is charged against current income. Delinquent consumer loans are handled in a similar manner as to those described above. The Company's procedures for repossession and sale of consumer collateral are subject to various requirements under applicable consumer protection laws.

The following table sets forth the Company's loan delinquencies by type, by amount and by percentage of type at September 30, 2011.

|                          | Loans Delinquent For      |               |                          |                                 |          |                          |            |               |                          | Total Delinquent Loans |               |                          |

Gross interest income which would have been recorded had the non-accruing loans been current in accordance with their original terms amounted to approximately \$7,000 for the three months and \$16,000 for the six months ended September 30, 2011 and \$7,000 for the three months and \$11,000 for the six months ended September 30, 2010.

**Classified Assets.** Federal regulations provide for the classification of loans and other assets, such as debt and equity securities, considered by the Office of the Comptroller of the Currency ("OCC") to be of lesser quality, as "substandard," "doubtful" or "loss." An asset is considered "substandard" if it is inadequately protected by the current net worth and paying capacity of the obligor or the collateral pledged, if any. "Substandard" assets include those characterized by the "distinct possibility" that the insured institution will sustain "some loss" if the deficiencies are not corrected. Assets classified as "doubtful" have all of the weaknesses inherent in those classified "substandard" with the added characteristic that the weaknesses present make "collection or liquidation in full" on the basis of currently existing facts, conditions and values, "highly questionable and improbable." Assets classified as "loss" are those considered "uncollectible" and of such little value that their continuance as assets without the establishment of a specific loss reserve is not warranted.

When an insured institution classifies problem assets as either substandard or doubtful, it may establish general allowances for losses in an amount deemed prudent by management. General allowances represent loss allowances which have been established to recognize the inherent risk associated with lending activities, but which, unlike specific allowances, have not been allocated to particular problem assets. When an insured institution classifies problem assets as "loss," it is required either to establish a specific allowance for losses equal to 100% of that portion of the asset so classified or to charge-off such amount. An institution's determination as to the classification of its assets and the amount of its valuation allowances is subject to review by the regulatory authorities, who may order the establishment of additional general or specific loss allowances.

In connection with the filing of its periodic reports with the OCC and in accordance with its classification of assets policy, the Bank regularly reviews loans in its portfolio to determine whether such assets require classification in accordance with applicable regulations. On the basis of management's review of its assets, at September 30, 2011, the Bank had classified a total of \$1,159,000 of its assets as substandard and \$371,000 as doubtful. At September 30, 2011, total classified assets, including foreclosed property, comprised \$1,571,000, or 7.8% of the Bank's capital, and 0.8% of the Bank's total assets.

Management's Discussion and Analysis of Financial Condition  
And Results of Operations

**Other Loans of Concern.** As of September 30, 2011, there were \$4.1 million in loans identified, but not classified, by the Bank with respect to which known information about the possible credit problems of the borrowers or the cash flows of the business have caused management to have some doubts as to the ability of the borrowers to comply with present loan repayment terms and which may result in the future inclusion of such items in the non-performing asset categories.

**Allowance for Loan Losses.** The allowance for loan losses is maintained at a level which, in management's judgment, is adequate to absorb credit losses inherent in the loan portfolio. The amount of the allowance is based on management's evaluation of the collectibility of the loan portfolio, including the nature of the portfolio, credit concentrations, trends in historical loss experience, specific impaired loans and economic conditions. Allowances for impaired loans are generally determined based on collateral values. The allowance is increased by a provision for loan losses, which is charged to expense and reduced by charge-offs, net of recoveries.

Real estate properties acquired through foreclosure are recorded at the fair value minus 20% of the fair value if the property is appraised at \$50,000 or less. If the property is appraised at greater than \$50,000, then the property is recorded at the fair value less 10% of the fair value. If fair value at the date of foreclosure is lower than the balance of the related loan, the difference will be charged-off to the allowance for loan losses at the time of transfer. Valuations are periodically updated by management and if the value declines, a specific provision for losses on such property is established by a charge to operations. At September 30, 2011, the Bank had two residential properties acquired through foreclosure. The properties are listed for sale.

Although management believes that it uses the best information available to determine the allowance, unforeseen market conditions could result in adjustments and net earnings could be significantly affected if circumstances differ substantially from the assumptions used in making the final determination. Future additions to the Company's allowance for loan losses will be the result of periodic loan, property and collateral reviews and thus cannot be predicted in advance. In addition, federal regulatory agencies, as an integral part of the examination process, periodically review the Bank's operations. Such agencies may require the Bank to increase the Bank's allowance for loan losses, increase classified assets, or take other actions that could significantly affect the Company's earnings based upon their judgment of the information available to them at the time of their examination. At September 30, 2011, the Company had a total allowance for loan losses of \$1,149,000, representing 0.94% of the Company's loans, net. At March 31, 2011, the Company's total allowance for loan losses to the Company's loans, net was at 0.95%. See Note 7 of Notes to Condensed Consolidated Financial Statements.

FIRST ROBINSON FINANCIAL CORPORATION  
Management's Discussion and Analysis of Financial Condition  
And Results of Operations

**Financial Condition**

***March 31, 2011 Compared to September 30, 2011***

Total assets of the Company decreased modestly by \$7.1 million, or 3.4%, to \$201.7 million at September 30, 2011 from \$208.8 million at March 31, 2011. The decrease in assets was primarily due to a decrease of \$7.4 million, or 27.0%, in cash and cash equivalents, and a decrease of \$2.9 million, or 5.6%, in available for sale securities, offset by an increase of \$1.8 million, or 1.5%, in loans receivable, net and an increase of \$1,380,000 or 100.0% in held-to-maturity securities

The decrease of \$7.4 million in cash and cash equivalents can be attributed, in part, to the decrease of \$14.8 million in total deposits.

Available-for-sale securities decreased to \$48.8 million at September 30, 2011 compared to \$51.7 million at March 31, 2011, a \$2.9 million decrease. The decrease resulted from the maturity of \$4.0 million in available-for-sale securities, the repayment of \$4.0 million in mortgage-backed securities and the amortization of \$124,000 of premiums and discounts on investments, offset by the purchase of \$5.1 million of available-for-sale securities and the increase of \$143,000 in the market valuation of the available-for-sale portfolio. The investment portfolio is managed to limit the Company's exposure to credit risk by investing primarily in mortgage-backed securities and other securities which are either directly or indirectly backed by the federal government or a local municipal government.

During the six months ended September 30, 2011, we purchased \$1.4 million in held-to-maturity securities. The securities were issued by a local municipality. We had no held-to-maturity securities at March 31, 2011.

Each quarter, management assesses whether there have been events or economic circumstances indicating that a security on which there is an unrealized loss is other-than-temporarily impaired. Management considers several factors, including the amount and duration of the impairment; the intent and ability of the Company to hold the security for a period sufficient for a recovery in value; and known recent events specific to the issuer or its industry. In analyzing an issuer's financial condition, management considers whether the securities are issued by agencies of the federal government, whether downgrades by bond rating agencies have occurred, and industry analysts' reports, among other things. As we currently do not have the intent to sell these securities and it is not more likely than not that we will be required to sell these securities before recovery of their amortized cost basis, which may be maturity, no declines are deemed to be other than temporary. We will continue to evaluate our investment securities for possible other-than-temporary impairment, which could result in non-cash charges to earnings in one or more future periods.

The Company's net loan portfolio including loans held for sale increased by \$1.8 million to \$122.3 million at September 30, 2011 from \$120.5 million at March 31, 2011. The increase can be attributed to the increase of \$2.1 million, or 3.9%, in loans on residential real estate, which includes one- to four-family loans, equity lines of credit, second mortgages and residential construction loans; the increase of \$3.0 million, or 8.9%, in commercial real estate loans; and the increase of \$1.5 million, or 9.3%, in consumer and other loans; offset by the decrease of \$3.6 million, or 18.8%, in commercial business and agricultural finance loans and the decrease in loans to state and municipal governments by \$79,000, or 10.3%. The decrease in commercial business and agricultural finance loans is the result of pay downs on operating lines of credit held by commercial customers. The increase in commercial real estate can be attributed to the Vincennes market where there are more opportunities for this type of lending. The increase in consumer and other loans reflects our more aggressive policy in writing indirect loans for vehicles.

At September 30, 2011, the allowance for loan losses was \$1,149,000, or 0.94% of the net loan portfolio, an increase of \$4,000 from the allowance for loan losses at March 31, 2011 of \$1,145,000, or 0.95% of the net loan portfolio. During the six-months ended September 30, 2011, the Company charged off \$416,000 in loan losses; \$297,000 from commercial business and agricultural finance loans; \$61,000 in commercial real estate loans; \$24,000 from loans secured by automobiles; \$26,000 in loans secured by one- to- four family properties; and \$8,000 in consumer and other loans. The charge offs were offset by recoveries of \$15,000 derived from \$9,000 in consumer and other loans and \$6,000 in automobile loans. Management reviews the adequacy of the allowance for loan losses quarterly, and believes that its allowance is adequate; however, the Company cannot assure that future chargeoffs and/or provisions will not be necessary. See "Asset Quality" for further information on delinquencies.

The Company has two foreclosed real estate properties held for sale at September 30, 2011 consisting of two residential properties at a value of \$41,000 compared to four residential properties and one commercial building at March 31, 2011 at a value of \$218,000. The commercial non-residential building was sold for an approximate loss of \$2,000 and three of the residential properties were sold at a net loss of \$3,000. One residential property was added to foreclosed property during the six months ended September 30, 2011. The property was sold subsequent to September 30, 2011. Foreclosed assets are carried at lower of cost or fair value. When foreclosed assets are acquired, any required adjustment is charged to allowance for loan losses. All subsequent activity is included in current operations. The remaining property is listed for sale.

Management's Discussion and Analysis of Financial Condition  
And Results of Operations

Total deposits decreased by \$14.8 million, or 8.4%, to \$161.5 million at September 30, 2011 from \$176.4 million at March 31, 2011. The decrease in total deposits was due to the decrease of \$5.5 million in non-interest bearing demand deposits and the decrease of \$6.9 million in certificates of deposit, and the decrease of \$2.4 million in savings, now and money market accounts.

Other borrowings, consisting of repurchase agreements, increased \$2.2 million, or 14.0% from \$15.6 million at March 31, 2011 to \$17.8 million at September 30, 2011. The obligations are secured by mortgage-backed securities and US Government agency obligations. At September 30, 2011, and March 31, 2011 the average rate on the repurchase agreements was 0.25%. The rate on approximately \$17.3 million of the repurchase agreements repriced daily. All agreements mature periodically within 24 months.

The short-term borrowing consists of the Company's revolving line of credit note payable with an unaffiliated financial institution which matured September 30, 2011 and was renewed until September 30, 2012. The balance of the revolving line of credit was \$2.0 million and \$1.8 million as of September 30, 2011 and March 31, 2011, respectively. The note bears interest at the prime commercial rate with a floor of 3.50% which was the rate on September 30, 2011 and is secured by stock of the Bank.

Stockholders' equity at September 30, 2011 was \$18,195,000 compared to \$12,765,000 at March 31, 2011, an increase of \$5.4 million, or 42.5%. Factors relating to the increase in stockholders' equity can be attributed primarily to the net receipt of \$4.8 million from the sale of 4,900 shares of Senior Non-Cumulative Perpetual Preferred Stock, Series A for participation in the US Treasury's Small Business Lending Fund program; the addition of \$973,000 of net income; offset by the payment of \$384,000 in common stock dividends and the payment of \$5,000 in preferred stock dividends and by the increase of \$88,000 in accumulated other comprehensive income due to the increase in the fair value of securities available for sale. These increases were offset by the decrease in additional paid-in-capital due to the purchase of \$14,000 in shares related to an incentive plan.

### Results of Operations

#### *Comparison of Operating Results for the Three Months Ended September 30, 2011 and 2010*

#### Net Income

The Company's net income available to common shareholders for the three month period ending September 30, 2011 was \$567,000, versus net income of \$404,000 in the same period of 2010, an increase of \$163,000, or 40.3%. Earnings for the three months ended September 30, 2011 were positively impacted by the \$239,000, or 16.3%, increase in net interest income, the increase of \$151,000, or 23.5%, in non-interest income, and the decrease in non-interest expense of \$19,000, or 1.3%, offset by the increase of \$105,000, or 233.3%, in provision for loan losses and the increase of \$136,000 in income tax provision when compared to the prior year. Basic and diluted earnings per common share for the three month period ending September 30, 2011 were \$1.38 and \$1.33, respectively, compared to basic and diluted earnings per common share of \$0.98 and \$0.94 for the three-months ended September 30, 2010. Diluted earnings per share reflect additional potential common shares that would have been outstanding if dilutive potential common shares had been issued, as well as any adjustment to income that would result from the assumed issuance. Potential common shares that may be issued by the Company relate solely to outstanding incentive plan shares and are determined using the treasury stock method.

#### Net Interest Income

For the three-month period ended September 30, 2011, net interest income totaled \$1,705,000, an increase of 16.3%, or \$239,000, compared to the same period of 2010. The increase in the three-month period ended September 30, 2011 versus the comparable period of 2010 was due to the decrease of \$205,000, or 33.1%, in total interest expense and the increase of \$34,000, or 1.6%, in total interest income. The increase in total interest income can be attributed to the increase of \$99,000, or 6.1%, in interest income from loans receivable, the increase of \$7,000, or 23.3%, from tax-exempt securities, and the increase of \$6,000, or 120.0%, in other interest income, offset by the decrease of \$78,000, or 18.5%, in interest income on taxable securities. The decrease in total interest expense is due primarily to the decrease of \$203,000, or 34.3%, in interest expense on deposits for the three months ended September 30, 2011 compared to the three months ended September 30, 2010.

For the three-months ended September 30, 2011, total average interest earning assets increased by \$12.1 million, or 7.0%, to \$184.6 million as of September 30, 2011 from \$172.5 million as of September 30, 2010. The yield on the earning assets decreased by 25 basis points when comparing the three months ended September 30, 2011 to the same period in 2010. Total average interest bearing liabilities for the three months ended September 30, 2011 were \$162.6 million compared to \$159.2 million as of September 30, 2010, an increase of \$3.4 million, or 2.1%. The cost on average interest bearing liabilities decreased by 54 basis points. For the three-month period ended September 30, 2011, the net interest spread increased 29 basis points to 3.57% versus 3.28% in the comparable period of 2010.

FIRST ROBINSON FINANCIAL CORPORATION  
Management's Discussion and Analysis of Financial Condition  
And Results of Operations

Interest income on loans receivable increased \$99,000 to \$1,726,000 for the quarter ended September 30, 2011 from \$1,627,000 for the quarter ended September 30, 2010 due to the average balance on loans for the quarter ended September 30, 2011 increasing \$8.8 million, or 7.8%, to \$121.1 million, versus \$112.3 million for the same period of 2010. During the same period, the yield on loans decreased 10 basis points to 5.70% from 5.80% for the September 30, 2011 quarter compared to the September 30, 2010 quarter. The 10 point basis decrease primarily reflected the lower interest rate environment.

Interest income on taxable securities decreased \$78,000 to \$343,000 for the quarter ended September 30, 2011 from \$421,000 for the quarter ended September 30, 2010. The decrease in interest income on taxable securities can be attributed to the decrease of \$2.0 million in the average balance from \$46.7 million as of September 30, 2010 to \$44.7 million as of September 30, 2011 and to the 53 basis point decrease in the yield on taxable securities when comparing the three-month periods ended September 30, 2011 to 2010.

Interest income on tax-exempt securities increased \$7,000 when comparing the three months ended September 30, 2011 to the same period in the prior year. The average balance on tax-exempt securities increased by \$557,000 from \$4.6 million as of September 30, 2010 compared to \$5.2 million as of September 30, 2011. The average yield on tax-exempt securities increased 20 basis points from 2.61% as of September 30, 2010 to 2.81% as of September 30, 2011. The average yield does not reflect the benefit of the higher tax-equivalent yield attributed to municipal securities, which is reflected in income tax expense.

Total interest expense on deposits decreased \$203,000 from \$591,000 for the three-months ended September 30, 2010 to \$388,000 for the three months ended September 30, 2011. The decrease can be attributed to a 65 basis point decrease in the average rate paid on total deposits from 1.71% as of September 30, 2010 to 1.06% as of September 30, 2011, offset by the increase of \$7.5 million in the average balance of deposits from \$138.3 million as of September 30, 2010 to \$145.8 million as of September 30, 2011. The decrease in the average rate paid on deposits is a reflection of lower short-term market interest rates.

**Provision for Loan Losses**

The provision for loan losses for the quarter ended September 30, 2011 was \$150,000, a \$105,000, or 233.3%, increase over the provision of \$45,000 for the September 30, 2010 quarter. The increase in our provision reflects the increase in our net charge offs of \$153,000 for the three months ended September 30, 2011 compared to net charge offs of \$29,000 for the three months ended September 30, 2010. The provision for both periods reflects management's analysis of the Company's loan portfolio based on the information which was available to the Company. Management meets on a quarterly basis to review the adequacy of the allowance for loan losses based on Company guidelines. Classified loans are reviewed by the loan officers to arrive at specific reserve levels for those loans. Once the specific reserve for each loan is calculated, management calculates general reserves for each loan category based on a combination of loss history adjusted for current national and local economic conditions, trends in delinquencies and charge-offs, trends in volume and term of loans, changes in underwriting standards, and industry conditions. While the Company cannot assure that future chargeoffs and/or provisions will not be necessary, the Company's management believes that, as of September 30, 2011, its allowance for loan losses was adequate. See "Asset Quality" and Note 7 of the Notes to Condensed Consolidated Financial Statements for additional information.

**Non-Interest Income**

Non-interest income categories for the three-month periods ended September 30, 2011 and 2010 are shown in the following table:

|  | Three Months Ended |        |          |
|--|--------------------|--------|----------|
|  | September 30,      |        |          |
|  | 2011               | 2010   | % Change |
|  | (In thousands)     |        |          |
| Non-interest income:                         |                    |        |          |
| Charges and fees on deposit accounts         | \$ 256             | \$ 240 | 6.7%     |
| Charges and other fees on loans              | 115                | 68     | 69.1     |
| Net gain (loss) on sale of foreclosed assets | (9)                | (2)    | (350.0)  |
| Net gain on sale of loans                    | 286                | 206    | 38.8     |
| Other  | 145                | 130    | 11.5     |
| Total non-interest income                    | \$ 793             | \$ 642 | 23.5%    |

FIRST ROBINSON FINANCIAL CORPORATION  
Management's Discussion and Analysis of Financial Condition  
And Results of Operations

Non-interest income increased \$151,000 when comparing the three-months ended September 30, 2011 to September 30, 2010 as a result of the increase of \$80,000 in net gain on sale of loans, the increase of \$47,000 in charges and fees on loans, the increase of \$16,000 in charges and fees on deposit accounts, and the increase of \$15,000 in other non-interest income, offset, in part, by the increase of \$7,000 on the loss on the sale of foreclosed property. A drop in mortgage interest rates in 2011 resulted in increased mortgage refinance activity aiding to the increase on the net gain on sale of loans.

**Non-Interest Expense**

Non-interest expense categories for the three-month periods ended September 30, 2011 and 2010 are shown in the following table:

|  | Three Months Ended |                 |               |
|--|--------------------|-----------------|---------------|
|  | September 30,      |                 | % Change      |
|  | 2011               | 2010            |               |
|  | (In thousands)     |                 |               |
| <b>Non-interest expense:</b>           |                    |                 |               |
| Compensation and employee benefits     | \$ 758             | \$ 799          | (5.1)%        |
| Occupancy and equipment                | 208                | 184             | 13.0          |
| Data processing and telecommunications | 127                | 102             | 24.5          |
| Audit, legal and other professional    | 61                 | 77              | (20.8)        |
| Advertising                            | 79                 | 72              | 9.7           |
| FDIC Insurance                         | 10                 | 52              | (80.8)        |
| Foreclosed property expense            | 7                  | 1               | 600.0         |
| Other                                  | 187                | 169             | 10.6          |
| <b>Total non-interest expense</b>      | <b>\$ 1,437</b>    | <b>\$ 1,456</b> | <b>(1.3)%</b> |

The decrease of \$41,000 in compensation and employee benefits resulted from a decrease in the market value of the incentive plan shares held in the Directors Retirement Plan. The increase of \$25,000 in data processing and telecommunications costs can be attributed, in part, to the increase in the usage of our bill pay product through internet banking and the increase in the maintenance costs associated with the software used for processing. The decrease in FDIC insurance, in response to the Dodd-Frank Financial Reform bill, is a result of our assessment decreasing from approximately 12 basis points annually on deposits to approximately 5 basis points annually on average assets less average tangible equity capital as reported in the Consolidated Reports of Condition and Income for the Bank. The increase in foreclosed property expense is a result of holding more properties during the three-months ended September 30, 2011 compared to the same period in the prior year. The increase in other non-interest expenses was primarily from the adjustment of the reserve held for off-balance sheet assets.

**Income Tax Expense**

The provision in income tax expense increased \$136,000, or 67.0%, for the three-months ending September 30, 2011, compared to the same period in 2010. The increase can be attributed, in part, to higher state tax rates and increased income. The effective tax rate was 37.2% for the quarter ended September 30, 2011 compared to 33.4% for the quarter ended September 30, 2010.

**Comparison of Operating Results for the Six Months Ended September 30, 2011 and 2010**

**Net Income**

For the six month period ended September 30, 2011, the Company's net income available to common shareholders was \$968,000, an increase of \$148,000, or 18.0%, from \$820,000 for the six months ending September 30, 2010. Earnings for the six months ended September 30, 2011 were positively impacted by an increase of \$178,000, or 6.5%, in net interest income after provision for loan losses, and an increase of \$165,000, or 13.0%, in non-interest income, which were offset by the increase of \$40,000, or 1.4%, in non-interest expense and by an increase of \$150,000, or 36.9%, in provision for income taxes when compared to the six months ended September 30, 2010. Basic and diluted earnings per common share for the six month period ending September 30, 2011 were \$2.36 and \$2.27, respectively, compared to basic and diluted earnings per common share of \$1.98 and \$1.91 for the six-months ended September 30, 2010. Diluted earnings per share reflect additional potential common shares that would have been outstanding if dilutive potential common shares had been issued, as well as any adjustment to income that would result from the assumed issuance. Potential common shares that may be issued by the Company relate solely to outstanding incentive plan shares and are determined using the treasury stock method.

FIRST ROBINSON FINANCIAL CORPORATION  
Management's Discussion and Analysis of Financial Condition  
And Results of Operations

**Net Interest Income**

For the six-month period ended September 30, 2011, net interest income totaled \$3,338,000, an increase of \$493,000, or 17.3%, from the same period in the prior year. Contributing to the increase was the increase of \$108,000, or 2.6%, in total interest income and the decrease of \$385,000, or 30.4%, in total interest expense. The increase in total interest income can be attributed to a \$247,000, or 7.8%, increase in interest income from loans receivable, the increase of \$8,000 in other interest income and a \$3,000, or 5.1%, increase in tax-exempt securities offset, in part, by the decrease of \$150,000, or 17.2%, in interest income from taxable securities. The major factor contributing to the decrease in total interest expense is the decrease of \$383,000, or 31.6%, interest expense on deposits.

For the six-months ended September 30, 2011 total average interest earning assets increased by \$14.4 million, or 4.6%, to \$184.9 million as of September 30, 2011 from \$170.5 million as of September 30, 2010. The yield on the earning assets decreased by 26 basis points when comparing the six months ended September 30, 2011 to the same period in 2010. Total average interest bearing liabilities for the six months ended September 30, 2011 were \$164.2 million compared to \$158.0 million as of September 30, 2010, an increase of \$6.1 million, or 3.9%. The cost on average interest bearing liabilities decreased by 53 basis points when comparing the two periods. For the six-month period ended September 30, 2011, the net interest spread increased 27 basis points to 3.49% versus 3.22% in the comparable period of 2010.

Interest income on loans receivable increased \$247,000 to \$3,411,000 for the six-months ended September 30, 2011 from \$3,164,000 for the six-months ended September 30, 2010 due to the average balance on loans for the six-months ended September 30, 2011 increasing \$11.8 million, or 10.9%, to \$120.4 million, versus \$108.6 million for the same period of 2010. During the same period, the yield on loans decreased 16 basis points to 5.67% from 5.83%.

Interest income on taxable securities decreased \$150,000 to \$721,000 for the six-months ended September 30, 2011 from \$871,000 for the six-months ended September 30, 2010. The decrease in interest income from taxable securities can be attributed to the decrease of \$2.7 million in the average balance of taxable securities from \$47.8 million as of September 30, 2010 to \$45.1 million as of September 30, 2011 and the decrease of 45 basis points in the average yield from 3.64% as of September 30, 2010 to 3.19% as of September 30, 2011.

Interest income on tax-exempt securities increased \$3,000 when comparing the six months ended September 30, 2011 to the same period in the prior year. The average balance on tax-exempt securities increased \$57,000 from \$4,466,000 as of September 30, 2010 compared to \$4,523,000 as of September 30, 2011. The average yield on tax-exempt securities increased 6 basis points from 2.68% as of September 30, 2010 to 2.74% as of September 30, 2011. The average yield does not reflect the benefit of the higher tax-equivalent yield attributed to municipal securities, which is reflected in income tax expense.

Total interest expense on deposits decreased \$383,000 from \$1,212,000 for the six months ended September 30, 2010 to \$829,000 for the six months ended September 30, 2011. The decrease can be attributed to a 65 basis point decrease in the average rate paid on total deposits from 1.77% as of September 30, 2010 to 1.12% as of September 30, 2011, offset by the increase of \$10.7 million in the average balance of deposits from \$137.0 million as of September 30, 2010 to \$147.7 million as of September 30, 2011. The decrease in the average rate paid on deposits is a reflection of the low short-term market interest rates.

**Provision for Loan Losses**

The provision for loan losses for the six-months ended September 30, 2011 was \$405,000 with a 350.0% increase over the provision of \$90,000 for the September 30, 2010 six-month period. The increase in our provision reflects the increase in our net charge offs of \$401,000 for the six months ended September 30, 2011 compared to net charge offs of \$3,000 for the six months ended September 30, 2010. The provision for both periods reflects management's analysis of the Company's loan portfolio based on the information which was available to the Company. Management meets on a quarterly basis to review the adequacy of the allowance for loan losses based on Company guidelines. Classified loans are reviewed by the loan officers to arrive at specific reserve levels for those loans. Once the specific reserve for each loan is calculated, management calculates general reserves for each loan category based on a combination of loss history adjusted for current national and local economic conditions, trends in delinquencies and charge-offs, trends in volume and term of loans, changes in underwriting standards, and industry conditions. While the Company cannot assure that future chargeoffs and/or provisions will not be necessary, the Company's management believes that, as of September 30, 2011, its allowance for loan losses was adequate. See "Asset Quality" and Note 7 of the Notes to Condensed Consolidated Financial Statements for additional information.

FIRST ROBINSON FINANCIAL CORPORATION  
 Management's Discussion and Analysis of Financial Condition  
 And Results of Operations

**Non-Interest Income**

Non-interest income categories for the six-month periods ended September 30, 2011 and 2010 are shown in the following table:

|  | Six Months Ended<br>September 30, |                 |              |
|--|-----------------------------------|-----------------|--------------|
|  | 2011                              | 2010            | % Change     |
| (In thousands)                                 |                                   |                 |              |
| <b>Non-interest income:</b>                    |                                   |                 |              |
| Charges and fees on deposit accounts           | \$ 490                            | \$ 489          | 0.2%         |
| Charges and other fees on loans                | 221                               | 158             | 39.9         |
| Net gain on sale of loans                      | 438                               | 341             | 28.4         |
| Net gain (loss) on sale of foreclosed property | (5)                               | 15              | (133.3)      |
| Net gain on sale of equipment                  | —                                 | 4               | (100.0)      |
| Other  | 295                               | 267             | 10.5         |
| <b>Total Non-Interest Income</b>               | <b>\$ 1,439</b>                   | <b>\$ 1,274</b> | <b>12.9%</b> |

Non-interest income increased \$165,000 when comparing the six-months ended September 30, 2011 to September 30, 2010 as a result of the increase of \$97,000 in net gain on sale of loans, the \$63,000 increase in charges and other fees on loans, and the increase of \$28,000 in other non-interest income offset, in part by the decrease of \$20,000 in gain on sales of foreclosed property. The \$28,000 increase in other non-interest income is primarily from interchange income from the increase in debit card usage by customers. The Company promotes a checking account product that rewards customers for debit card usage.

**Non-Interest Expense**

Non-interest expense categories for the six-month periods ended September 30, 2011 and 2010 are shown in the following table:

|  | Six Months Ended<br>September 30, |                 |             |
|--|-----------------------------------|-----------------|-------------|
|  | 2011                              | 2010            | % Change    |
| (In thousands)                         |                                   |                 |             |
| <b>Non-interest expense:</b>           |                                   |                 |             |
| Compensation and employee benefits     | \$ 1,531                          | \$ 1,538        | (0.5)%      |
| Occupancy and equipment                | 369                               | 352             | 4.8         |
| Data processing and telecommunications | 243                               | 203             | 19.7        |
| Audit, legal and other professional    | 120                               | 142             | (15.5)      |
| Advertising                            | 147                               | 134             | 9.7         |
| FDIC insurance                         | 67                                | 103             | (34.9)      |
| Foreclosed property expense            | 18                                | 4               | 350.0       |
| Other                                  | 348                               | 327             | 6.4         |
| <b>Total Non-Interest Expense</b>      | <b>\$ 2,843</b>                   | <b>\$ 2,803</b> | <b>1.4%</b> |

Expenses associated with occupancy and equipment increased \$17,000 when comparing the September 2011 and 2010 six-month periods as a result of a new parking lot being constructed at the Robinson facility. The increase of \$40,000 in data processing and telecommunications costs can be attributed, in part, to the increase in the usage of our bill pay product through internet banking and the increase in the maintenance costs associated with the software used for processing. Audit, legal and other professional services decreased \$22,000 when comparing the September 2011 and 2010 six-month periods due to decreased legal costs. The decrease in FDIC insurance, in response to the Dodd-Frank Financial Reform bill, is a result of our assessment decreasing from approximately 12 basis points annually on deposits to approximately 5 basis points annually on average assets less average tangible equity capital as reported in the Consolidated Reports of Condition and Income for the Bank. The increase in foreclosed property expense is a result of holding more properties during the six-months ended September 30, 2011 compared to the same period in the prior year. The increase in other non-interest expenses was primarily from the adjustment of the reserve held for off-balance sheet assets.

FIRST ROBINSON FINANCIAL CORPORATION  
Management's Discussion and Analysis of Financial Condition  
And Results of Operations

**Income Tax Expense**

The provision in income tax expense increased \$150,000, or 36.9%, for the six-months ending September 30, 2011, compared to the same period in 2010. The increases can be attributed to increased profitability. The effective tax rate for the six-months ended September 30, 2011 and 2010 were 36.4% and 33.1%, respectively.

**Off-Balance Sheet Arrangements**

The Company has entered into performance standby and financial standby letters of credit with various local commercial businesses in the aggregate amount of \$473,000. The letters of credit are collateralized and underwritten, as currently required by our loan policy, in the same manner as any commercial loan. The advancement of any funds on these letters of credit is not anticipated.

**Liquidity and Capital Resources**

The Company's principal sources of funds are deposits and principal and interest payments collected on loans, investments and related securities. While scheduled loan repayments and maturing investments are relatively predictable, deposit flows and early loan prepayments are more influenced by interest rates, general economic conditions and competition.

Liquidity resources are used principally to meet outstanding commitments on loans, to fund maturing certificates of deposit and deposit withdrawals and to meet operating expenses. The Company anticipates no foreseeable problems in meeting current loan commitments. At September 30, 2011, outstanding commitments to extend credit amounted to \$30.4 million (including \$21.2 million, in available revolving and closed-ended commercial and agricultural lines of credit). Management believes that loan repayments and other sources of funds will be adequate to meet any foreseeable liquidity needs.

The Bank maintains a \$17.6 million line of credit with the FHLB, which can be accessed immediately. As of September 30, 2011 and 2010, there were no advances outstanding for either period. The Bank also maintains a \$6.7 million revolving federal funds line of credit with The Independent Bankers Bank ("TIB") of which no balance was outstanding at September 30, 2011 and \$35,000 was outstanding at September 30, 2010. The Company also has a \$2.5 million revolving line of credit with an unaffiliated financial institution of which \$2.0 million was outstanding at September 30, 2011 and \$1.8 million outstanding at September 30, 2010, secured by 100% stock of the Bank. The Bank has also established borrowing capabilities at the discount window with the Federal Reserve Bank of St. Louis. Investment securities of \$3,000,000 have been pledged as collateral. As of September 30, 2011 and 2010, no amounts were outstanding at the Federal Reserve discount window.

Liquidity management is both a daily and long-term responsibility of management. We adjust our investments in liquid assets based upon management's assessment of (i) expected loan demand, (ii) expected deposit flows, (iii) yields available on interest-bearing investments, and (iv) the objectives of its asset/liability management program. Excess liquidity generally is invested in interest-earning overnight deposits and other short-term government and agency obligations.

On August 23, 2011, the Company entered into a Securities Purchase Agreement with the Secretary of the Treasury, pursuant to which the Company issued and sold to the Treasury 4,900 shares of its Senior Non-Cumulative Perpetual Preferred Stock, Series A, having a liquidation preference of \$1,000 per share (the "Series A Preferred Stock"), for aggregate proceeds of \$4,900,000. The issuance was pursuant to the Treasury's Small Business Lending Fund program, established under the Small Business Jobs Act of 2010, which encourages lending to small businesses by providing capital to qualified community banks with assets of less than \$10 billion. The Series A Preferred Stock is entitled to receive non-cumulative dividends payable quarterly on each January 1, April 1, July 1 and October 1, commencing October 1, 2011. The dividend rate, which is calculated on the aggregate Liquidation Amount, has been initially set at 1% per annum based upon the current level of "Qualified Small Business Lending" ("QSBL") by the Bank. The dividend rate for future dividend periods will be set based upon the percentage change in qualified lending between each dividend period and the baseline QSBL level established at the time the Agreement was entered into. Such dividend rate may vary from 1% per annum to 5% per annum for the second through tenth dividend periods, and from 1% per annum to 7% per annum for the eleventh through the first half of the nineteenth dividend periods. If the Series A Preferred Stock remains outstanding for more than four-and-one-half years, the dividend rate will be fixed at 9%. Prior to that time, in general, the dividend rate decreases as the level of the Bank's QSBL increases. Such dividends are not cumulative, but the Company may only declare and pay dividends on its common stock (or any other equity securities junior to the Series A Preferred Stock) if it has declared and paid dividends for the current dividend period on the Series A Preferred Stock, and is subject to other restrictions on its ability to repurchase or redeem other securities. In addition, if (i) the Company has not timely declared and paid dividends on the Series A Preferred Stock for six dividend periods or more, whether or not consecutive, and (ii) shares of Series A Preferred Stock with an aggregate liquidation preference of at least \$25,000,000 are still outstanding, the Treasury (or any successor holder of Series A Preferred Stock) may designate two additional directors to be elected to the Company's Board of Directors.

FIRST ROBINSON FINANCIAL CORPORATION  
Management's Discussion and Analysis of Financial Condition  
And Results of Operations

As is more completely described in the Certificate of Designation, holders of the Series A Preferred Stock have the right to vote as a separate class on certain matters relating to the rights of holders of Series A Preferred Stock and on certain corporate transactions. Except with respect to such matters and, if applicable, the election of the additional directors, the Series A Preferred Stock does not have voting rights.

The Company may redeem the shares of Series A Preferred Stock, in whole or in part, at any time at a redemption price equal to the sum of the Liquidation Amount per share and the per-share amount of any unpaid dividends for the then-current period, subject to any required prior approval by the Company's primary federal banking regulator, the Office of the Comptroller of the Currency.

The Company and the Bank are subject to capital requirements of the federal bank regulatory agencies which require the Bank to maintain minimum ratios of Tier I capital to total adjusted assets and to risk-weighted assets of 4%, and total capital to risk-weighted assets of 8% respectively. Generally, Tier I capital consists of total stockholders' equity calculated in accordance with generally accepted accounting principles less intangible assets, and total capital is comprised of Tier I capital plus certain adjustments, the only one of which is applicable to the Bank is the allowance for loan losses. Risk-weighted assets refer to the on- and off-balance sheet exposures of the Bank adjusted for relative risk levels using formulas set forth by OCC regulations. The Bank is also subject to an OCC leverage capital requirement, which calls for a minimum ratio of Tier I capital to quarterly average total assets of 3% to 5%, depending on the institution's composite ratings as determined by its regulators. Both the Bank and the Company are considered well-capitalized under federal regulations.

At September 30, 2011, the Bank's compliance with all of the aforementioned capital requirements is summarized below:

|                           | Actual    |        | For Capital Adequacy Purposes |       | To be Well Capitalized Under the Prompt Corrective Action Provisions |        |
|---------------------------|-----------|--------|-------------------------------|-------|--|--------|
|                           | Amount    | Ratio  | Amount                        | Ratio | Amount   | Ratio  |
| Total Risk-Based Capital  |           |        |                               |       |  |        |
| (to Risk-Weighted Assets) | \$ 20,120 | 17.36% | \$ 9,270                      | 8.00% | \$ 11,588  | 10.00% |
| Tier I Capital            |           |        |                               |       |  |        |
| (to Risk-Weighted Assets) | 18,929    | 16.33  | 4,635                         | 4.00  | 6,953  | 6.00   |
| Tier I Capital            |           |        |                               |       |  |        |
| (to Average Assets)       | 18,929    | 9.49   | 7,978                         | 4.00  | 9,972  | 5.00   |

At the time of the conversion of the Bank to a stock organization, a special liquidation account was established for the benefit of eligible account holders and the supplemental account holders in an amount equal to the net worth of the Bank. This special liquidation account will be maintained for the benefit of eligible account holders and the supplemental account holders who continue to maintain their accounts in the Bank after June 27, 1997. In the unlikely event of a complete liquidation, each eligible and the supplemental eligible account holders will be entitled to receive a liquidation distribution from the liquidation account in an amount proportionate to the current adjusted qualifying balances for accounts then held. The Bank may not declare or pay cash dividends on or repurchase any of its common stock if stockholders' equity would be reduced below applicable regulatory capital requirements or below the special liquidation account.

FIRST ROBINSON FINANCIAL CORPORATION

Item: 3 **Quantitative and Qualitative Disclosures about Market Risk**

Not applicable.

Item: 4 **Controls and Procedures**

Any control system, no matter how well designed and operated, can provide only reasonable (not absolute) assurance that its objectives will be met. Furthermore, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected.

**Disclosure Controls and Procedures**

The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e)) under the Exchange Act as of the end of the period covered by this report. Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that, as of September 30, 2011 Company's disclosure controls and procedures were effective to provide reasonable assurance that (i) the information required to be disclosed in this Report was recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (ii) information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is accumulated and communicated to Company's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding disclosure.

**Internal Control Over Financial Reporting**

There have been no changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings  
 None

Item 1A. Risk Factors  
 Investing in First Robinson Financial Corporation involves various risks which are particular to our company, our industry and our market area. We believe all significant risks to investors in First Robinson Financial Corporation have been outlined in Part I, Item 1A of our Annual Report on Form 10-K for the fiscal year ended March 31, 2011. However, other risks may prove to be important in the future, and new risks may emerge at any time. We cannot predict with certainty all potential developments which could materially affect our financial performance or condition. Various risks and uncertainties, some of which are difficult to predict and beyond the Company's control, could negatively impact the Company. As a financial institution, the Company is exposed to interest rate risk, liquidity risk, credit risk, operational risk, risks from economic or market conditions, and general business risks among others. Adverse experience with these and other risks could have a material impact on the Company's financial condition and results of operations, as well as the value of its common stock.

**The Standard & Poor's downgrade in the U.S. government's sovereign credit rating, and in the credit ratings of instruments issued, insured or guaranteed by certain related institutions, agencies and instrumentalities, could result in risks to the Company and general economic conditions that we are not able to predict.**

On August 5, 2011, Standard & Poor's downgraded the United States long-term debt rating from its AAA rating to AA+. On August 8, 2011, Standard & Poor's downgraded the credit ratings of certain long-term debt instruments issued by Fannie Mae and Freddie Mac and other U.S. government agencies linked to long-term U.S. debt. Instruments of this nature are key assets on the balance sheets of financial institutions, including the Bank. These downgrades could adversely affect the market value of such instruments, and could adversely impact our ability to obtain funding that is collateralized by affected instruments, as well as affecting the pricing of that funding when it is available. We cannot predict if, when or how these changes to the credit ratings will affect economic conditions. These ratings downgrades could result in a significant adverse impact to the Company, and could exacerbate the other risks to which the Company is subject, including those described under Risk Factors in the Company's March 31, 2011 Annual Report on Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds  
 The following table provides information about purchases by the Company for the quarter ended September 30, 2011 regarding the Company's common stock.

PURCHASES OF EQUITY SECURITIES BY COMPANY (1)

| Period               | Total Number of Shares Purchased | Average Price Paid per Share | Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs | Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs |
|----------------------|----------------------------------|------------------------------|--|--|
| 7/1/2011 – 7/31/2011 | —                                | —                            | —  | 3,445  |
| 8/1/2011 – 8/31/2011 | —                                | —                            | —  | 3,445  |
| 9/1/2011– 9/30/2011  | —                                | —                            | —  | 5,000  |

\*As provided in Rule 406T of Regulation S-T, this information shall not be deemed "filed" for purposes of Section 11 and 12 of the Securities Act of 1933 and Section 18 of the Securities Exchange Act of 1934 or otherwise subject to liability under those sections.

**CERTIFICATION PURSUANT TO  
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Rick L. Catt, certify that:

1. I have reviewed this quarterly report on Form 10-Q of First Robinson Financial Corporation (the "Registrant");
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
4. The Registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) for the registrant and have:
  - (a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
  - (b) designed such internal control over financial reporting or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) evaluated the effectiveness of the Registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) disclosed in this report any changes in the Registrant's internal control over financial reporting that occurred during the Registrant's most recent fiscal quarter, that has materially affected, or is reasonably likely to materially affect, the Registrant's internal control over financial reporting; and
5. The Registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Registrant's auditors and the audit committee of the Registrant's board of directors (or persons performing the equivalent functions):
  - (a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Registrant's ability to record, process, summarize and report financial information; and
  - (b) any fraud, whether or not material, that involves management or other employees who have a significant role in the Registrant's internal control over financial reporting.

**CERTIFICATION PURSUANT TO  
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the Quarterly Report on Form 10-Q of First Robinson Financial Corporation (the "Company") for the quarterly period ending September 30, 2011 as filed with the Securities and Exchange Commission on the date of this Certification (the "Report"), we, Rick L. Catt, Chief Executive Officer and Jamie E. McReynolds, Chief Financial Officer of the Company, certify, pursuant to section 906 of the Sarbanes-Oxley Act of 2002, that:

- (1) the Report fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) the information contained in the Report fairly presents, in all material respects, the financial condition and result of operations of the Company.

A signed original of this written statement required by Section 906, or another document authenticating, acknowledging or otherwise adopting the signature that appears in typed form within the electronic version of the written statement required by Section 906, has been provided to First Robinson Financial Corporation and will be retained by First Robinson Financial Corporation and furnished to the Securities and Exchange Commission or its staff upon request.
